

“A person’s pursuit of goodness leads to greatness, but the pursuit of greatness leads to ruin. Pursue goodness and you will achieve great things.” - John E. Kramer

Occupational Therapy

promotes independence in meaningful activities

- Fine Motor Skills (pinching, writing, in-hand manipulation)
- Gross Motor Skills (jumping, climbing, bilateral coordination)
- Visual Motor Skills (copying shapes, identifying shapes)
- Sensory Regulation (avoiding loud noises, seeking touch)
- Behavioral Regulation (coping strategies, modeling)

**Skills are addressed through the use of play and functional activities*

Physical Therapy

promotes independence in movement for active participation

- Muscle Flexibility
- Strengthening/Therapeutic Exercise (core strength, limb strength)
- Gait Training (crawling, walking patterns)
- Protective Reactions (balance on stable/unstable surfaces)
- Gross Motor Coordination (use of one side of the body, use of both sides of the body)

Speech-Language Pathology

promotes independence in use of language and communication

- Receptive language (how to process information received)
- Expressive language (production of words and combination of words into phrases)
- Social Pragmatic language (communication with others)
- Unaided forms (body language, sign language, gestures)
- Aided forms (pen and paper, iPad)
- Assisted Augmentative Communication (AAC)

Our Services

We provide Occupational Therapy, Physical Therapy, and Speech-Language Pathology services in a variety of Clinic-based, Homecare, School System Consultation, Aquatic Therapy, Athletic Fitness, and Community Based Programs. These services may be a 1:1 instruction or a group-based dynamic. These individualized and diverse services allow comprehensive and holistic habilitative and rehabilitative care for all children ranging from birth through young adult with varying abilities.
